### "AU REVOIR"

The time has come for another parting of ways. To the men of this Company I want to express my appreciation for the cooperation given me during the short time I have been here. It has been a pleasure to work with the men of Company 4792.

In just a few days you will have a new Commanding Officer, in the person of Lieut. Jordahl, who comes to this company from the Sunnyside Camp. I hope that the men who are remaining will extend to Lieut. Jordahl the same cooperation that I have had and that all will work toward retaining for this camp the standard of excellence that it has always had.

A large number of you men are leaving the CCC after terms of service of varying lengths. Some few have served the maximum two years, while others have been only one "hitch." Some will be returning to school, others to private employment and yet no small number will be in the line-up when other enrollment periods roll around.

As you go about your plans for this homecoming take stock of yourself. Are you a better individual for having been in the CCC, or have you gone backwards, or stood still? Have you taken advantage of the opportunities for educational improvement, or have you ~~spent~~ your spare moments "in town?" Have you honestly put in a days work in return for your monthly check, or have you "slid through" the easy way? Have you cooperated with your fellow members in keeping the camp attractive and clean, or have you failed to carry your share of the load? Have you conducted yourself in the community as a gentleman and impressed the people with whom you come in contact, or have you been a nuisance and a public problem? All these probabilities are only a few of what you could have been or were. For the men who were looking to the future and spent his time in the CCC attempting to better himself, the experience will be invaluable. Such an individual will become an important asset to society. The men who chose the "other path" can only look back on their stay in the CCC as a period of waste and as they grow older the fact will become more and more apparent.

Regardless into which class you may fall an honest inventory of yourself will tell the story. Even though you have chosen the "easy way" during your stay in the CCC there is still opportunity to make an effort to do better. You will soon find that life has a little place for the "shirker" or the "slacker." Now is the time to take the step in the right direction.

In closing I wish to again express my appreciation to those who have worked so well in making this an outstanding organization and who have really been interested in furthering that end.

Cecil M. Sanlon  
Acting Company Commander
